Spotlight on **CITF-FUNDED RESEARCH**

CITF Announcements

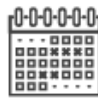

Changes to our newsletter

You may have noticed: *Research Roundup* is now called *Spotlight on CITF-Funded Research*. We're streamlining our weekly newsletter to focus on our research results and events. Our *Publications from our Experts* and *International Research Review* sections are not gone for good though! They will be included in a new monthly magazine we'll be launching soon, also featuring lots of CITF and COVID-related content, including our latest modelling results and the best of our *Spotlight on CITF-Funded Research* for the month. Stay tuned!

Updated FAQ Page

We've updated our FAQ page. Get the latest on the most frequently asked questions about the virus, immunity, testing, serosurveillance and other population-based studies, and vaccination.

Protecting Canada's long-term care residents from COVID-19: The evidence behind the policies

Thursday, October 28, 2021 | 1 – 2:30 p.m. EDT

Register now!

Join us in this second *CITF/CanCOVID Seminar Series: Research Results & Implications*, as eight COVID-19 Immunity Task Force (CITF)-supported research teams from across Canada unveil their latest findings. They will discuss how their respective studies present consistent results, offering strong scientific evidence to aid in protecting Canada's long-term care residents, staff, and visitors.

Find out what evidence is behind the latest policy decisions, including making this vulnerable population eligible for a third dose of a COVID-19 vaccine in many provinces and territories. Stay with us to participate in a lively question-and-answer period.

CITF-Funded Research Results

A comprehensive review of international vaccine certificate programs for COVID-19

Vaccine certificates or "passports" are becoming more commonplace, with access to restaurants, event venues, and even workplaces increasingly dependent on proof of vaccination against COVID-19. To better understand how different jurisdictions are implementing digital vaccine certificates, researchers from the Ottawa Hospital Research Institute, including CITF-funded researcher Dr. Kumanan Wilson, performed a review of available literature to identify vaccine certificate policies being put into effect around the globe. The peer-reviewed manuscript has been published in *Human Vaccines and Immunotherapeutics*.

CITF jobs

An exciting opportunity to join our team

The CITF is looking for a Research Associate (Immune Science) to support the next phase of our scientific strategy related to vaccine immunity. The Research Associate will have the opportunity to work with a vibrant team of investigators, public health practitioners, clinicians, researchers and administrative staff dedicated to conducting research and leading other

scientific activities to inform public health decision-making and improve health outcomes for Canadians.
